

51st ANNUAL MEETING BOURGAS 21-23 MAY 2014 FINAL PROGRAMME

In less than two weeks time the European Towage Industry's tugowners and top management will gather in the Bulgarian port city of Bourgas, hosted by our local member Multraship Bulgaria.

The final programme, which can be downloaded [here](#) also features a Conference on climate change challenges under the theme "Towage facing the Power of Nature and the Force of Laws and Regulations".

Prominent speakers representing shipowners, ship designers, shipyards and engine manufacturers will describe the regulatory framework designed by the competent authorities to address this issue in maritime transport and will illustrate the intense efforts by all actors involved to find adequate remedies.

Over 50 attendees have registered to date. This excellent turnout confirms the permanently growing interest of full and associate members to support and follow the works of the ETA. The Annual Meeting is indeed recognised as a particularly strong platform to exchange valuable information on regulatory, technical and safety matters in the towage sector and offers high level networking opportunities.

Though hotel reservations cannot be guaranteed any longer our hosts and the secretariat would give it every effort to accommodate last minute registrations for those who have overlooked to register in time or could not decide in due course. The registration form can be found [here](#).

Welcome to Bourgas!
